

IMPROOF workshop 2020 Spring Meeting Sunday 29 March 2020

IMPROOF project

IMPROOF is a European Union H2020 project* which aims to improve the energy efficiency of steam cracking furnaces, while reducing emissions of greenhouse gases and NO_x.

The strongly industrially oriented consortium is composed of the following partners:

AVGI, Ayming, CERFACS,

LRGP-CNRS, CRESS, Dow,

Ghent University, John Zink,

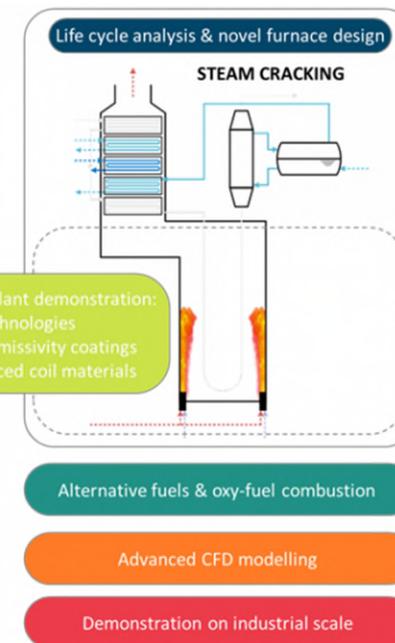

POLIMI, Schmidt & Clemens and TechnipFMC

Discussion

- Presentation of the project results and outcomes: new capacity / improvements of the plant, productivity
- materials, pilot results and tube production
- reduction of CO₂ emissions

Prof. Kevin Van Geem	Ghent University
Georgios Bellos	DOW
Marko Djokic	Ghent University
Dr. Dietlinde Jakobi	S&C
Peter Oud	TechnipFMC

Practical information:

- This workshop is organized by the IMPROOF consortium, registration is open for all stakeholders from both industry and academia.
- It will take place at the Marriott Marquis Houston, 1777 Walker St. Houston, connected to the 2020 Spring Meeting and 16th Global Congress on Process Safety
- Attendance is free of charge, but registration is required: eventmanager.ugent.be/improofWorkshop (additional information on improof.cerfacs.fr)
